

John Gillett

BE Civil (Hons), DipBusMgt, FIEAust, MICE (UK), CEng, MAICD

John has management, business development and project experience gained in large corporate and multinational businesses, having lived and worked in Australia, USA, UK and Indonesia.

He is a professional civil engineer with business experience in resource industries, infrastructure and government. He has established companies and joint ventures in Australia and several countries of Asia.

John has been in CEO, business development and project roles for engineering, consulting and construction services businesses. In recent years he has been jointly responsible for the integration of construction services into an Australian-based engineering consultancy to service clients in the resources sector.

John has been a member of government advisory bodies, industry and public policy institutions.

Current and Recent Roles:

2013 – current	Delaney Jones Gillett & Associates Pty Ltd, Director
2001 – 2012	URS Asia – Pacific, Senior Vice President, Director Major Projects and Business Lines
1998 – 2000	URS Greiner Woodward Clyde, Managing Director , Asia-Pacific
1997 – 1998	Kellogg Brown & Root, Director Civil Infrastructure Asia Pacific
1985 - 1996	Kinhill Ltd, Director of public holding company and Director of several subsidiaries and joint ventures

Experience:

John has had a long career in the professional engineering and construction services industry. He has been responsible for establishing and managing projects, joint ventures and company structures to provide engineering and project services to public and private clients throughout Australia and countries of Asia. He has worked on, mobilised, and managed projects in all states of Australia and internationally, including Indonesia, Philippines, Singapore, Malaysia, India, China, Hong Kong, Vietnam, Pakistan, Bangladesh, Sri Lanka, Cambodia, Papua New Guinea, New Caledonia and New Zealand.

He has experienced many project issues, and impacts of social, civil and natural events that required a steady hand and management of personnel and client relationships under difficult circumstances. He is committed to environmentally responsible development, to safety and to a healthy work environment. He has seen many multi-year projects through from initiation to final close out, always committed to complete the contract and provide the client with a sound project outcome within budget and schedule.

Services:

- Strategic and business planning for new businesses and projects.
- International business development, especially in building links between companies in Australia, Asia and the Pacific.
- Project directorship and project management of engineering infrastructure and resource projects.
- Establishment and management of engineering service businesses, joint ventures and consortia.
